

BUILDING PERMIT FEES

Revised 10/25/19

FEES: Permit fees vary depending on the type of permit and the associated scope of work. The building department uses International Code Council (ICC) Building Valuation Data to calculate permit fees.

IMPORTANT NOTES: The building permit fee may not be the only fee you face for certain work. New commercial and residential construction will be assessed Impact Fees through the permitting process to collect Police, Fire, Public Facilities and Parks & Recreation (residential only) impact fees. Additionally, the City's Utilities Department will assess impact and tap fees for connection to the City's water and sewer system.

Exterior projects within the City's Historic Districts require receipt of a Certificate of Approval prior to permitting. A "Planning/HDC" application will need to be submitted prior to submitting a permit application.

KEY CONTACTS: The Building Department will guide your application through appropriate reviews with other departments. For instances of new construction and the installation of irrigation systems, please contact the City's Utilities Department at 904-310-3420 to discuss fees associated with connection to the City's water and sewer system.
