

## COMPREHENSIVE PLAN:

### FUTURE LAND USE MAP CATEGORY

Policy 1.07.08 8th Street Small Area Mixed Use ( MU8) (renumbering to follow other land use categories)

It is the purpose of the 8th Street Small Area land use category to provide flexible land use and design which promotes pedestrian-level activity. The 8th Street small area land use is intended to promote the 8th Street corridor as a thriving gateway to the historic downtown of Fernandina. The only area where the 8<sup>th</sup> Street small area land use is permissible are those properties located along the southern half of the Ash Street Block, between 9<sup>th</sup> and 7<sup>th</sup> Street blocks to the east and west, and Lime Street to the south.

- A. This district provides for integrated or stand-alone commercial retail, offices, housing, and civic uses. Convenient access to transit opportunities, innovative housing options, and pedestrian-oriented design are key considerations in the redevelopment of these areas.
- B. Warehouse storage and heavy industrial uses shall not be permissible within this land use category.
- C. Uses allowable within the MU8 land use category recognizes the desire to maintain commercial development while integrating residential allowances to fulfill market demand for housing needs and to provide commercial services easily accessible to residents within the area.
- D. The maximum density is up to 18 units per acre.

## **LAND DEVELOPMENT CODE:**

### **ZONING DISTRICT**

#### **2.01.10 8<sup>th</sup> Street Small Area Mixed Use (MU- 8)** (renumbering of all zoning categories which follow)

The MU-8 district is intended for redevelopment of the City's 8<sup>th</sup> Street commercial corridor to allow for a combination of residential, office, housing, and general commercial activities in a vibrant urban setting. The MU-8 district is intended to promote the 8<sup>th</sup> Street corridor as a thriving gateway to the historic downtown of Fernandina Beach through economical and efficient land use, an improved level of amenities, residential density through a variety of housing types, and a better compact, urban environment. Properties within the MU-8 district shall provide for a unified pedestrian and landscape area along the 8<sup>th</sup> Street frontage to serve as an extension of the downtown Fernandina Beach character and design. The allowable density in the MU-8 zoning district is a maximum of 18.0 units per acre.

REC	NA	75	NA

- Notes:
1. For RE, R-1, R-2, R-3, OT-1, and OT-2, the FAR standard applies to any permissible commercial uses.
  2. The minimum lot width for lots platted prior to the effective date of this LDC is fifty (50) feet. The minimum lot width for lots platted on or after the effective date of this LDC is seventy-five (75) feet.
  3. The maximum impervious surface ratio within the “Central Business District” land use **category**, as depicted on the Future Land Use Map, may be 1.00 where the application is for redevelopment of a lot that is developed with 100% impervious surface. Where the application is for new development of a vacant lot, the maximum impervious surface on the lot may be 100% where stormwater facilities are available and have sufficient capacity to accept the runoff from the lot.
  4. Development is permissible on lots which were platted before the effective date of this LDC and have a minimum width of twenty-five (25) feet.
  5. Proposed development on lots within the “Recreation” land use, as depicted on the Future Land Use Map shall not exceed 0.25 impervious surface ratio.

6. Lots located within 800 feet of the Mean High Water Mark of the Atlantic Ocean shall be permitted a maximum FAR of 1.50, as long as the FAR for all General Commercial lots in the City, combined, does not exceed an overall FAR of 0.50.
7. Refer to Section 4.02.07 of this Chapter for maximum lot coverage.

REC	25	None	None	None	None

1. A building on any lot within 800 feet of the mean high water line of the Atlantic Ocean shall not exceed thirty-five (35) feet in height.
2. Each side yard setback shall be increased by one-half (½) foot for each one (1) foot, or fraction thereof, of building heights above twenty-five (25) feet.
3. Buildings shall not encroach into the required clear visibility triangle at intersections, as set forth in Section 7.01.08.
4. Where access is provided from an alley or public street to the rear of the principal building, no side yard setback is required. Where such access is not available, one (1) side yard shall be a minimum of ten (10) feet. Any other side yard shall have a minimum side yard setback of zero (0) feet.
5. Rayonier and Smurfit Stone are exempt from the height regulation for Mill operations.

### Section 4.0 3.03 Standards for Development in MU-8 ( 8<sup>th</sup> Street Small Area )

#### **8<sup>th</sup> Street Small Area Design Standards**

General Principles. The 8<sup>th</sup> Street standards are intended to encourage flexibility and variety in development through creative site and building design. All development shall contribute to making 8<sup>th</sup> Street a distinct and memorable part of the city, unique in spaces, buildings, and street character. Development shall be oriented and designed to contribute to the street environment and shall place priority on pedestrian comfort, convenience, safety, and access. Pedestrian scale elements refer to buildings and spaces whose dimensions, properties, and components correspond to human occupation and use. Access to all development shall be sited and designed to have a positive visual impact on the street with primary pedestrian access from 8<sup>th</sup> Street. Driveways and parking shall not take priority over pedestrian areas. Variety in design elements, transparency, color, texture, signs, and materials creates a visually interesting environment and contributes to the establishment of an architectural character for the corridor. Architectural compatibility is not limited to any particular style.

The design standards for the 8<sup>th</sup> Street Small Area are as follows:

1. On the portion of the property fronting 8<sup>th</sup> Street, there is a required six (6) foot pedestrian/landscaping access area to provide a continuous, unobstructed clear walkway. This is to be measured from the property line going back six (6) feet. Buildings or building components may encroach into this space starting at the second story, with necessary structural components on the first story, provided an open pedestrian/landscape space is maintained. Required bicycle parking is not permissible within this area.
2. The setbacks for the remaining sides of the property are zero (0) feet.
3. Building Orientation.
  - a. Primary entrances shall face 8<sup>th</sup> Street. At least one public entrance of each principal structure shall be oriented toward the front lot line or side lot line. Developments are encouraged to provide as many pedestrian connections to the street as feasible.
  - b. On corner lots, new buildings shall be oriented toward the streets and shall consider and complement the patten of existing adjoining development, with the **primary façade(s) of the principal building facing the 8<sup>th</sup> Street facing lot line.** Corner locations shall be considered opportunities for distinctive architecture.
  - c. Accessory structures, if any, shall be located at the rear of the principal buildings. **All detached garages or carports shall be set back from the front façade of the principal building by at least 10 feet, openings shall not face 8<sup>th</sup> Street. Where feasible, detached garage and carport access shall be from the side streets.**

- d. All outdoor mechanical equipment shall be located at the rear of the principal buildings and screened. Screening may be structural or vegetative. They shall not be visible from any street. Mechanical equipment placed on the roof shall be screened from abutting streets with parapets or other types of visual screening.
- e. Solid waste, recycling, and yard trash containers; grease containers, and loading docks shall be screened and located in parking areas or other locations remote from the sidewalk.
4. Site and Building Access. The City shall encourage shared access to reduce driveway cuts on 8<sup>th</sup> Street as redevelopment occurs and require cross access design for internal traffic. New driveway cuts which do not serve to reduce the overall number of cuts onto 8<sup>th</sup> Street shall be located on 7<sup>th</sup>, 9<sup>th</sup> Streets, east-west side streets.
  - a. Whenever feasible, driveway access to a site shall be shared with adjacent properties and parking shall be located internally to the block or at the rear of the site.
  - b. Service areas associated with multi-family dwellings shall be accessed from the rear of the site, where feasible.
5. Building Design Standards. Individual building design shall defer to ensemble of buildings on the street rather than call undue attention to itself. New buildings shall contribute to the life of the street.
  - a. Architectural articulation. A building's exterior walls shall be articulated using material, architectural elements, arrangement of openings, design of horizontal and vertical planes, and changes in height to provide substantial massing variations. Long, monotonous roof planes and uninterrupted expanses of blank wall are not allowed along street frontages. Articulated roof forms and wall opening shall be used to add visual interest and contribute to a pedestrian scale.
    - i. Where solid walls are required by building code, the wall shall be articulated and divided into distinct modules, through the use of projections and recesses (i.e. setbacks, reveals, belt courses, awnings, arcades, porches, etc.) within the building envelope or projecting from upper floors.
    - ii. Commercial buildings and buildings with ground floor commercial uses shall have a ceiling height minimum of twelve (12) feet for the ground floor.
  - b. Entryways. Doorways, windows, storefronts, and other openings in the facades of buildings shall be placed and proportioned to reflect pedestrian scale and movement and to encourage visual interest at the street level. The use of functional and decorative elements, including weather protection features (i.e. colonnades, arcades, canopies, etc.), signage, and architectural detailing, shall be used to create human scale on a buildings principal façade. Elements shall be integral to the architecture of the building, designed so as not to appear to be "tacked on" to the building façade.
6. Fences. Up to 8 foot tall fences are permissible to surround mixed use and commercial properties.
  - a. Fence Material: Black Wrought Iron or Iron-like Aluminum

- b. Where a portion of the fence is visible from 8<sup>th</sup> Street landscape screening shall be required.
- 7. Improvement of bicycle and pedestrian paths is required.
- 8. Signs within the MU-8 zoning district shall follow the allowable sign standards set forth for the Historic District as contained in LDC Section 8.01.03 - (NEED TO DISCUSS SETBACK, MAX SIGN FACE, AND HEIGHT REQUIREMENT FOR FREE STANDING SIGNS)

Landscape Requirements NEW SECTION 4.05.06 (Non-Residential and Mixed Use Development)

A. Minimum Landscaped Area (current policy 4.05.04 (D))

At least 20% of the total gross land area of a development shall be landscaped except within the Central Business District (CBD)/ C-3 zoned properties where a minimum of 10% of the total gross land area shall be landscaped. Minimum landscaped areas requirements may be achieved through use of planters and roof top gardens or plantings within stormwater improvements in all zoning districts.

B. ADD 8<sup>th</sup> Street specific standards Six (6) foot pedestrian and access area for pedestrian/landscape improvements

Notes:

1. Resort rentals in R-1 or R-2 zoning districts that existed prior to the effective date of Ordinance 2000-28 (October 3, 2000) may continue a legal non-conforming status as long as the resort rental permit has not expired for a period of greater than 180 days.
2. Properties that have obtained the WMU Future Land Use category are subject to the permitted uses in the W-1 column. Residential units are permitted above non-residential uses. Stand alone residential uses are prohibited.
3. Group Residential uses in existence prior to the adoption of Ordinance 2007-22 may continue a legal non-conforming status as long as a Group Residential Permit is applied for and maintained in accordance with the terms of the Ordinance. Existing uses shall not be subject to the Supplemental Standards in Section 6.02.24.
4. Seasonal Sales are subject to the provisions of LDC Section 5.02.02 and a temporary use permit is required according to the procedures set forth in Chapter 11.

FERNANDINA BEACH  
CONSIDERATIONS FOR 8<sup>TH</sup> STREET SMALL AREA

10/15/15 DRAFT

- Notes: 1. As to the Rayonier and Smurfit Stone properties, permitted yard storage shall include process by-products and new or used process parts for use in or sale of by the mill".
2. Cremation Facilities shall be subject to the supplemental standards provided in Section 6.02.26

For Discussion Only

Supplemental Standards for:

- Automobile Repair (access, landscaping- no outdoor tire storage or tire display, no 8<sup>th</sup> street facing garage bay)
- Automobile Sales, New and Used (access, landscaping -limit number of cars that may be parked out front on display)
- Automotive Rental Agencies (access, landscaping, limit number of cars that may be parked out front on display)
- Gasoline Stations (access, landscaping, no outdoor tire storage or tire display, no 8<sup>th</sup> street facing garage bay) \*Look at Gaines Street Before and After
- Laundry and Dry Cleaning, On-Site Including Self-Service Laundry\_P
- Laundry and Dry Cleaning, Pick Up Only \_P
- ~~Utility Facilities, such as Electric Substations, Water and Wastewater Treatment Plants~~
- Add Stormwater Park Category of Uses (subject to supplemental)

\*Limit access for ALL drive thru facilities to not be located on 8<sup>th</sup> Street - no entry/exit from 8<sup>th</sup> Street
