

## Installation of Non-Standard Concrete/Asphalt Driveways

Pavers are allowed within the City of Fernandina Beach rights-of-way for use as residential driveways and as sidewalks. Pavers must meet FDOT Specifications Section 526 (ASTM C902 Brick Pavers or ASTM C936 Concrete Pavers).

A notarized certification from the contractor/builder is required before any final inspections are performed.

The City of Fernandina Beach is **not responsible** for any maintenance repairs of pavers in the rights-of-way. If there is a new or existing sidewalk within any portion of the new replacement section of the permitted driveway, no modifications or alterations may be made to the sidewalk in any way without prior written authorization. American with Disabilities Act Standards (ADA) must be strictly followed. Should any portion of the permitted driveway be determined to be out of compliance with City standards and/or ADA standards, the owner or owner’s agent will be required to remove this non-conforming section and replace it within 48 hours of written notice by the City of Fernandina Beach. This requirement will be enforced even if the existing driveway or modification to the sidewalk are not showing on the drawings submitted with this driveway permit. In the event the City of Fernandina Beach or any utility companies need to make repairs in the City right-of-way, which may include removal or damage to the non-standard installation of the driveway, the owner or owner’s agent fully understand that they are solely responsible for the replacement and/or repair at their own expense.

By signing below, owner or owner’s agent fully understand, agree to the above conditions, and certify that the pavers meet the above-mentioned specifications, at the following location:
